

AXIS LIMB POSITIONER

Packed size: 580 x 310 x 218mm

Total weight: 11.9kg including container

The Axis Limb Positioner is a robust, precision-engineered device designed for secure intraoperative limb positioning. It is siderail mountable using universal clamps and features a single-lever clamping mechanism that simultaneously locks linear movement and the ball joint for fast, reliable adjustment. Supplied fully autoclavable with a dedicated sterilisation container.
