

PATIENT POSITIONER

390 x 300 x 130 mm (Height) when packed or collapsed
4.56 kg (Weight)

The Patient Positioner is a compact and durable clinical positioning device made from 16 mm 304 stainless steel with flattened sides to prevent rotational movement. It features PU-moulded pressure pads for comfort and easy cleaning. The unit can be secured using standard Clark sockets, with optional siderail clamps available. The device is non-autoclavable.
