

PELVIS TRAINER

with full-length tibia & femur

Pelvis: 400 x 300 x 170mm - 1.8kg (W)

Tibia & Femur: 900 x 90 x 60mm - 0.33kg (W)

The Pelvis Trainer with full-length tibia & femur is a realistic anatomical training model designed for orthopaedic education and procedural practice. It features a durable polyurethane-moulded pelvis combined with soft inner-core femur & tibia components to simulate natural bone handling. Rotational movement at both the hip & knee joints allows for dynamic positioning and functional training.
